Memo to File:

Re: U.S. Gypsum Company
Jensen Quarry
ACT/041/008

An attempt was made on January 5th, 1978 by Ron Daniels, Jim Smith and Mike Thompson to inspect the gypsum quarries operated by U.S. Gypsum Company at Sigurd, Utah. Because of snow cover, the field inspection was cancelled, however, a meeting involving Mr. Roger Brown, U.S. Gypsum's Plant Manager took place.

A subsequent field inspection was discussed for the spring. Reclamation trials were performed in 1970 where only four-wing saltbrush survived. A discussion of this is included in the "Mining and Reclamation Plan." An Interstate Highway is proposed where they are presently mining, and grazing rights for the property are leased on an alternate year schedule.

MIKE THOMPSON *MT*
RECLAMATION HYDROLOGIST
